# Who We Are

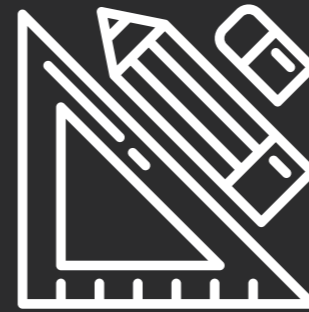

The SWR Group was established in Hemel Hempstead in 1989 and we have been sourcing components from around the world ever since. Our ethos is to consistently provide high quality products and services, whilst keeping customer and staff success and happiness at the core of everything we do.

We now employ 58 fantastic people at Eastman Way, Hemel Hempstead, along with many more in our extended network of approved partners. We have a strong vision to continue and accelerate our growth rate through to 2020, and beyond, to ensure that new and exciting opportunities continue to arise for our highly dedicated and determined team.

Saving you **Time, Hassle** and **Money** using our Global Network of Quality Approved Suppliers

# How We Do Things

## Send

Send us your drawings or components and we will liaise with our partners overseas and get you a guide price.

## Sample

If you're happy with the costs, we will get a sample produced for your approval. Our quality is your reputation.

## Source

Once agreed, we will manage the entire manufacturing process. Saving you Time, Hassle and Money.

## Ship

We will then take care of the importing and delivery of your goods utilising our global logistics network.

# What Best Describes You?

## Purchasing Manager

Our hassle free and flexible approach, makes sourcing your perfect components a dream. With competitive quotes and fast turnaround we save you time and money without sacrificing quality.

## Technical Manager

We work in partnership with you to ensure that all our sourced components are precision engineered to the highest level of quality, meeting all your stringent specifications.

## Quality Manager

Our quality and auditing processes ensure all our partners, suppliers and components are audited and tested in line with our stringent quality system.

## Supply Manager

Our logistics team and infrastructure allow us to create custom crafted supply chain solutions to ensure your components are always in the right place at the right time.

# Steel Components

We have been designing and sourcing both standard and bespoke custom-engineered steel components to manufacturers and OEM's exact specifications for over 30 years. Components can be designed, manufactured and supplied in mild or high tensile steels, stainless steel and aluminium.

We can manufacture steel components and assemblies utilising our global supply network of engineering, technical and production specialists. Our British team of experts, working in partnership with our global supply chain ensure we deliver tailored solutions that drive down your costs without sacrificing performance.

## Why Us?

- Cost effective reproductions of your original components
- Rapid prototyping and samples service
- We manage the import process with reliable freight forwarders and customs brokers
- Logistics supported by our global network and state of the art warehouses
- Call off orders managed by your own dedicated account manager
- Comprehensive ISO9001:2008 certified quality management system
- All quotations delivered with relevant technical documentation
- Inspection and documentation of all production batches – full traceability

# Plastic Components

We can design and source industrial grade and machine engineered plastic components to a wide range of manufacturers and industries. Components can be designed, manufactured and supplied in materials from PTFE, to nylon or acrylic and in conjunction with other hard wearing composites. All of our components are engineered to the highest tolerances and samples can be provided to ensure they meet even the most demanding industries and applications.

With over 30 years of experience our British team of experts, working in partnership with our global supply chain ensure we deliver tailored solutions that drive down your costs without sacrificing performance.

## Why Us?

- Cost effective reproductions of your original components
- Rapid prototyping and samples service
- Logistics supported by our global network and state of the art warehouses
- Call off orders managed by your own dedicated account manager
- Comprehensive ISO9001:2008 certified quality management system
- All quotations delivered with relevant technical documentation
- Inspection and documentation of all production batches – full traceability

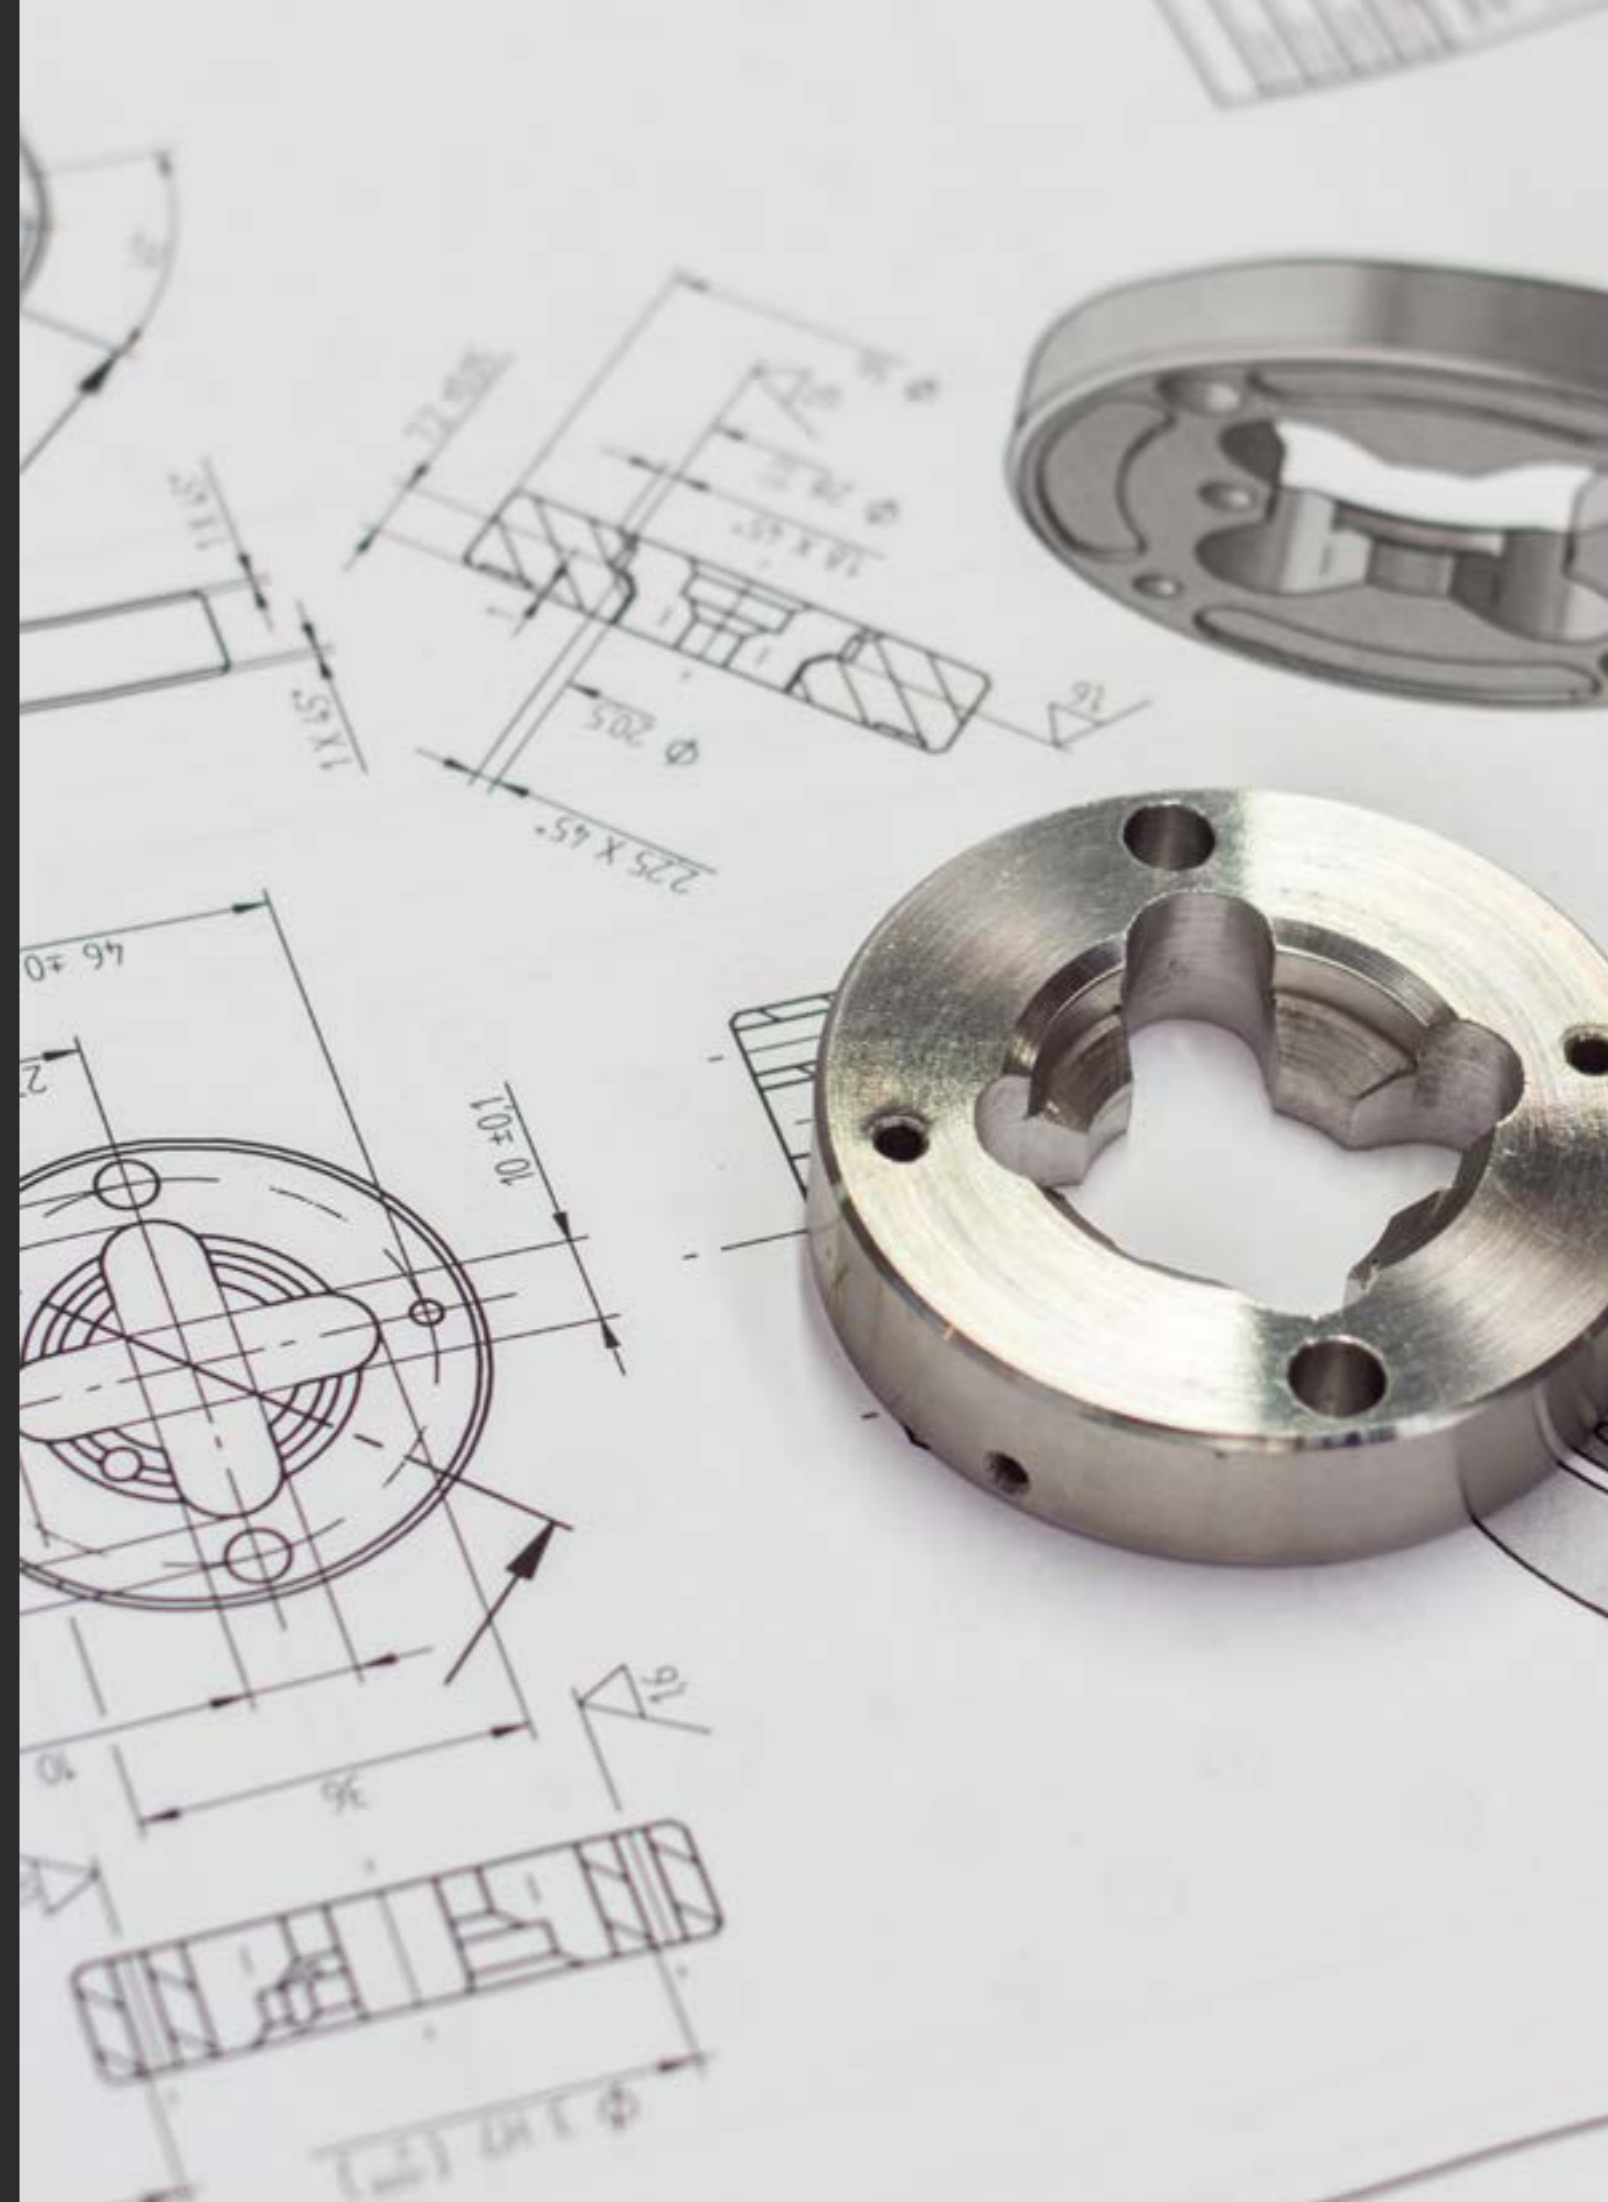

# Bespoke Parts

We have been designing bespoke custom-engineered components by working with manufacturers and partners to ensure we provide components that exceed your expectations from both a quality and cost perspective. Components can be designed and manufactured in nearly all hard wearing composites.

We can manufacture bespoke components and assemblies utilising our global supply network of engineering, technical and production specialists. Our British team of experts, working in partnership with our global supply chain ensure we deliver tailored solutions that drive down your costs without sacrificing performance.

## Why Us?

- Cost effective reproductions of your original components
- Rapid prototyping and samples service
- We manage the import process with reliable global agents, freight forwarders and customs brokers.
- Logistics supported by our global network and state of the art warehouses
- Call off orders managed by your own dedicated account manager
- Comprehensive ISO9001:2008 certified quality management system
- All quotations delivered with relevant technical documentation
- Inspection and documentation of all production batches – full traceability

# Wire Rope Assemblies

Since 1989, we have been the leading specialist in Wire Rope Assemblies in the UK. With a sister company dedicated to the supply of wire rope and fittings and the manufacture of bespoke wire rope assemblies, you can rest assured we have the technical knowledge to support your project.

With the rapid growth in that division, outsourcing large quantities of assemblies to the Far East has become second nature to us and now, with SWR Sourcing, we want to pass this expertise on to you.

With over 30 years of experience our British team of experts, working in partnership with our global supply chain ensure we deliver tailored solutions that drive down your costs without sacrificing performance.

## Why Us?

- Cost effective reproductions of your original components
- Rapid prototyping and samples service
- We manage the import process with reliable global agents, freight forwarders and customs brokers.
- Logistics supported by our global network and state of the art warehouses
- Call off orders managed by your own dedicated account manager
- Comprehensive ISO9001:2008 certified quality management system
- All quotations delivered with relevant technical documentation
- Inspection and documentation of all production batches – full traceability

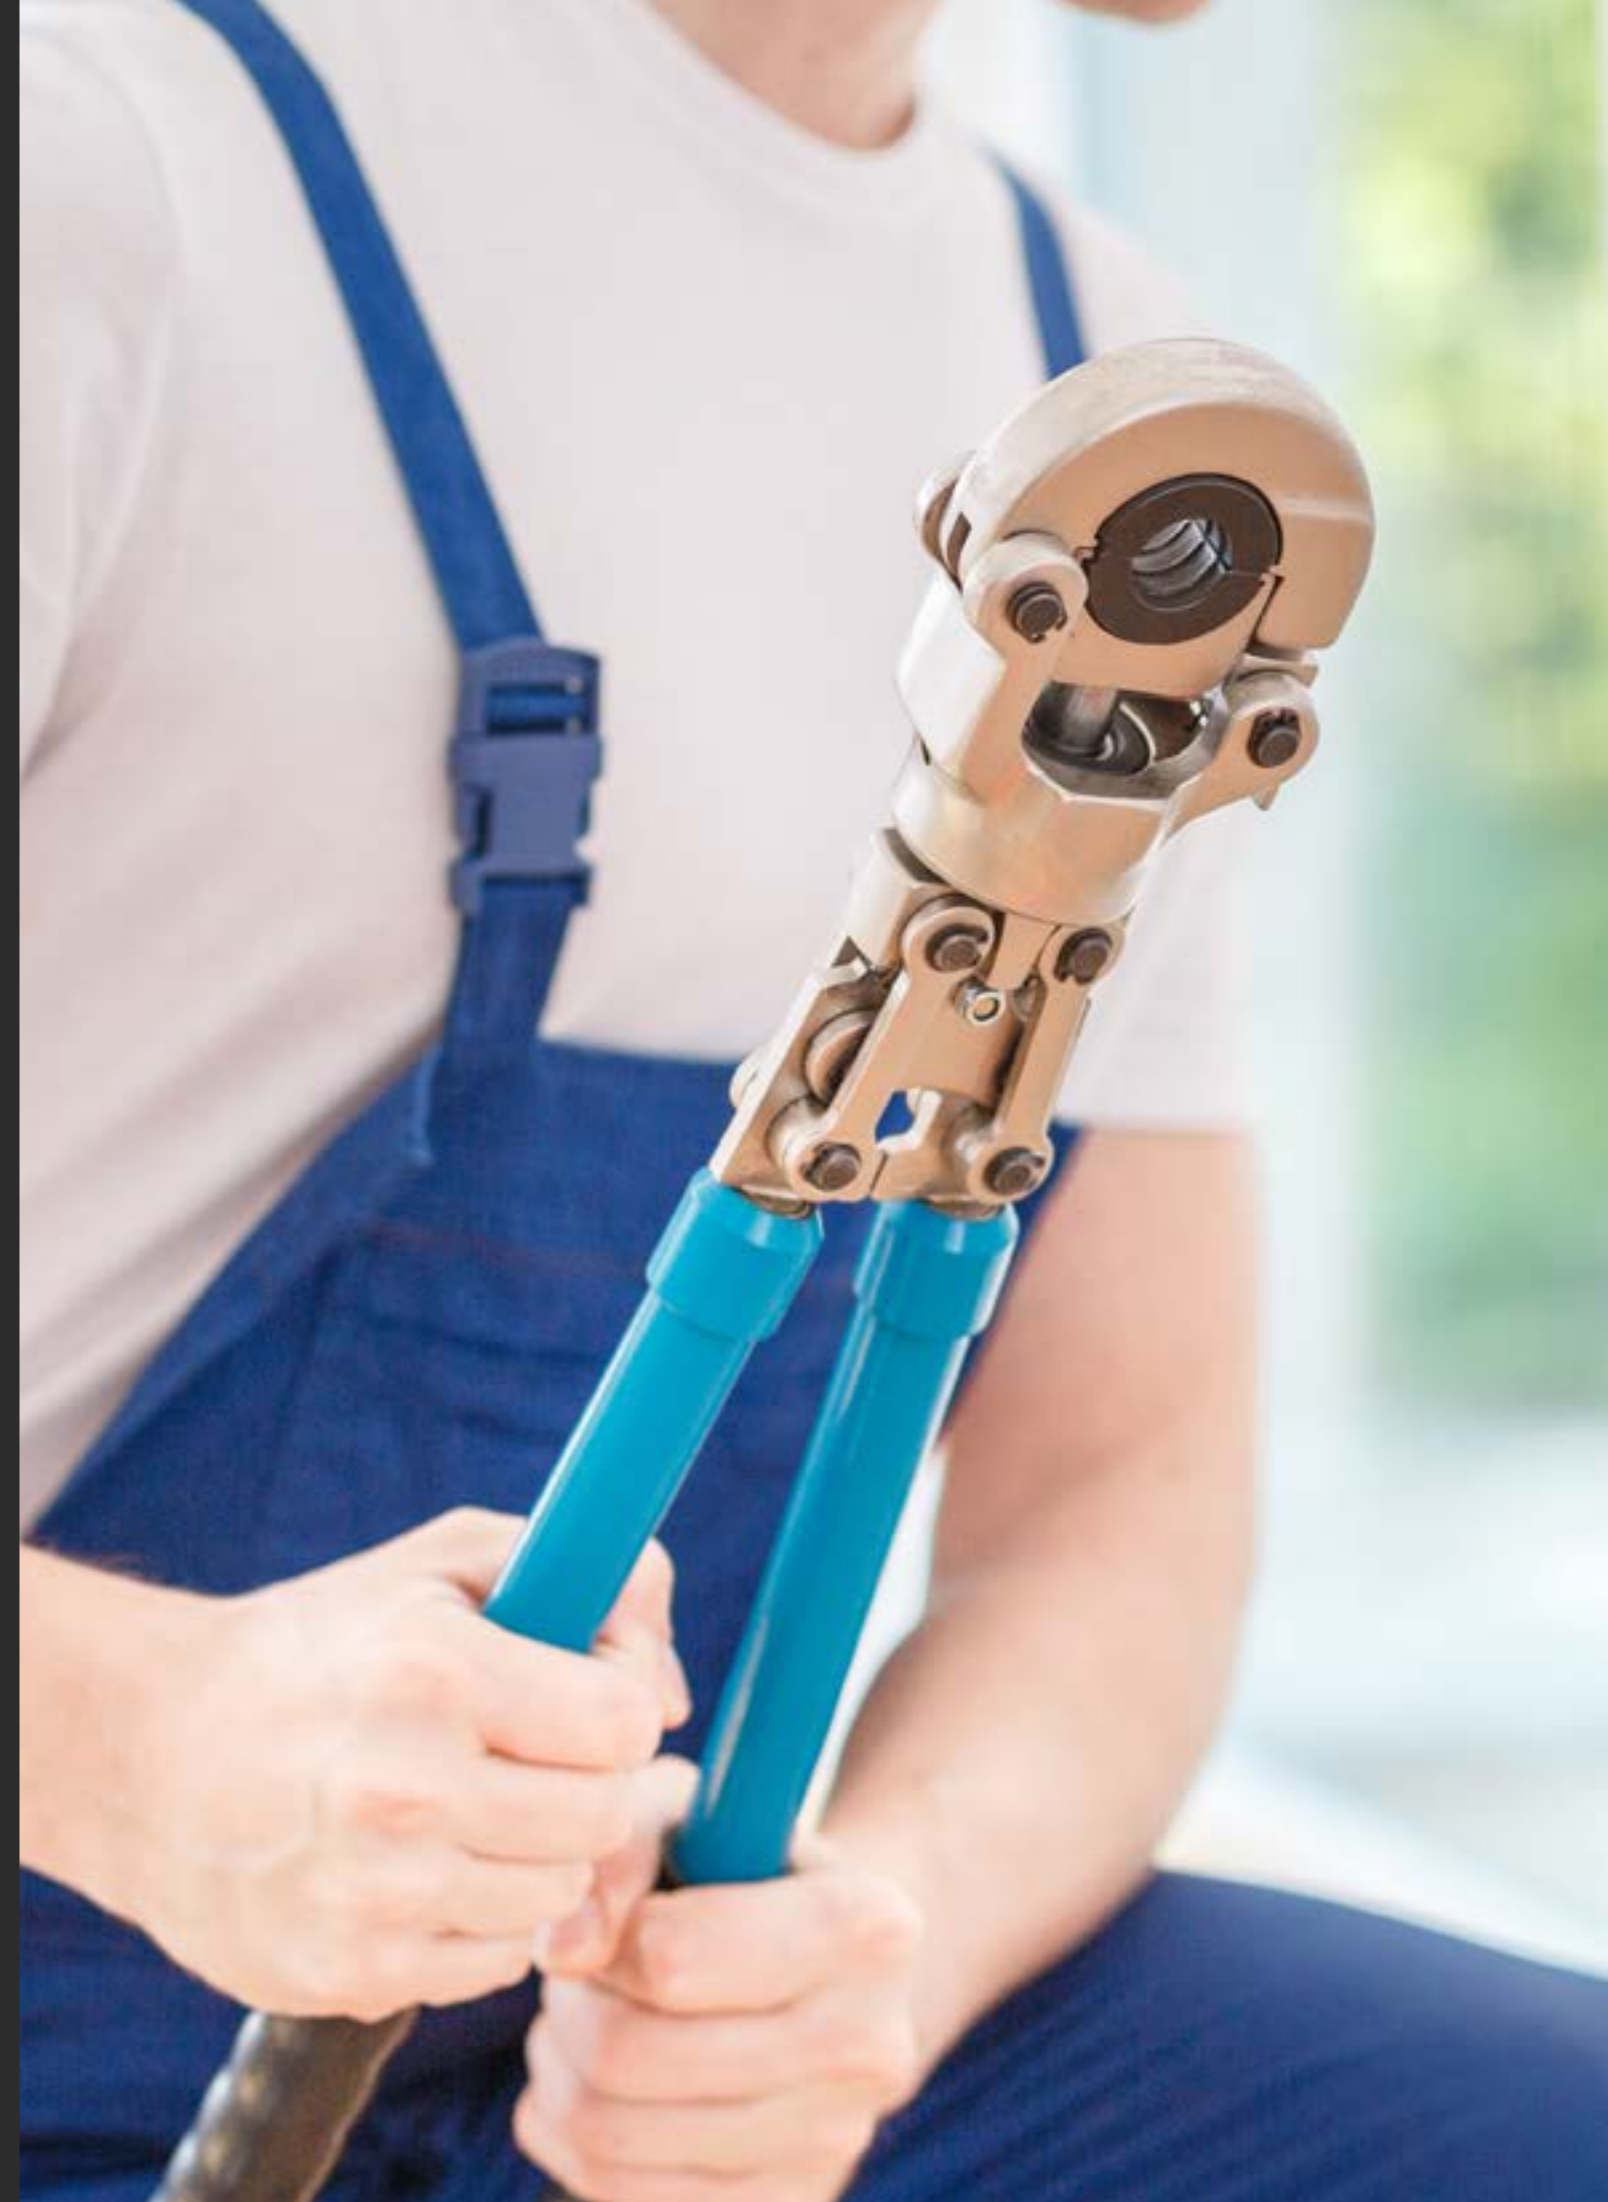

# Tools

We specialise in the supply and sourcing of high-quality and cost-effective hand and hydraulic tools across all industries. Our partners have modern CAD and production facilities which also allows for the design and development of bespoke tools where a standard solution isn't enough.

Just send us your requirements and we will help to source the right tooling for you. All our tools are produced to ISO 9001:2000 standard and all products are GS and CE certified by TUV.

## Why Us?

- Rapid prototyping and samples service
- We manage the import process with reliable global agents, freight forwarders and customs brokers.
- Logistics supported by our global network and state of the art warehouses
- Call off orders managed by your own dedicated account manager
- Comprehensive ISO9001:2008 certified quality management system
- All quotations delivered with relevant technical documentation
- Inspection and documentation of all production batches – full traceability

# Springs

We have years of experience when it comes to sourcing springs. For years, we have patterned springs for the Garage Door industry and today we supply thousands of springs a year. Although our expertise lies in extension springs, we can easily source compression and torsion springs to your exact requirements. Contact us today for long-lasting and efficient springs which actually get the job done.

With over 30 years of experience our British team of experts, working in partnership with our global supply chain ensure we deliver tailored solutions that drive down your costs without sacrificing performance.

## Why Us?
